DarkWork | The top labor exchange

06 Jan 2018 13:22

CPU / GPU miner:

sell

Specific goods - for specific people!

The hidden miner under the CPU: -Codenon C / C ++

-Full hidden program launch (after opening the victim will not know this)

-Stable work with many pools [Example-Minergate / NiceHash]

-Mining BCN / XMR / QCN / DSH / XDN / FCN / MCN / AEON / INF8

-After the start, the build is automatically deleted, and the minor remains stitched into the system.

Black market

Mar 18, 2010 2:28 pm

Selling Stiller + Clipper 1000 rubles, all in one file is not glueing

WARRANTY: I give you the admin panel (you can not change your password) and Stiller himself, testing, try - buy

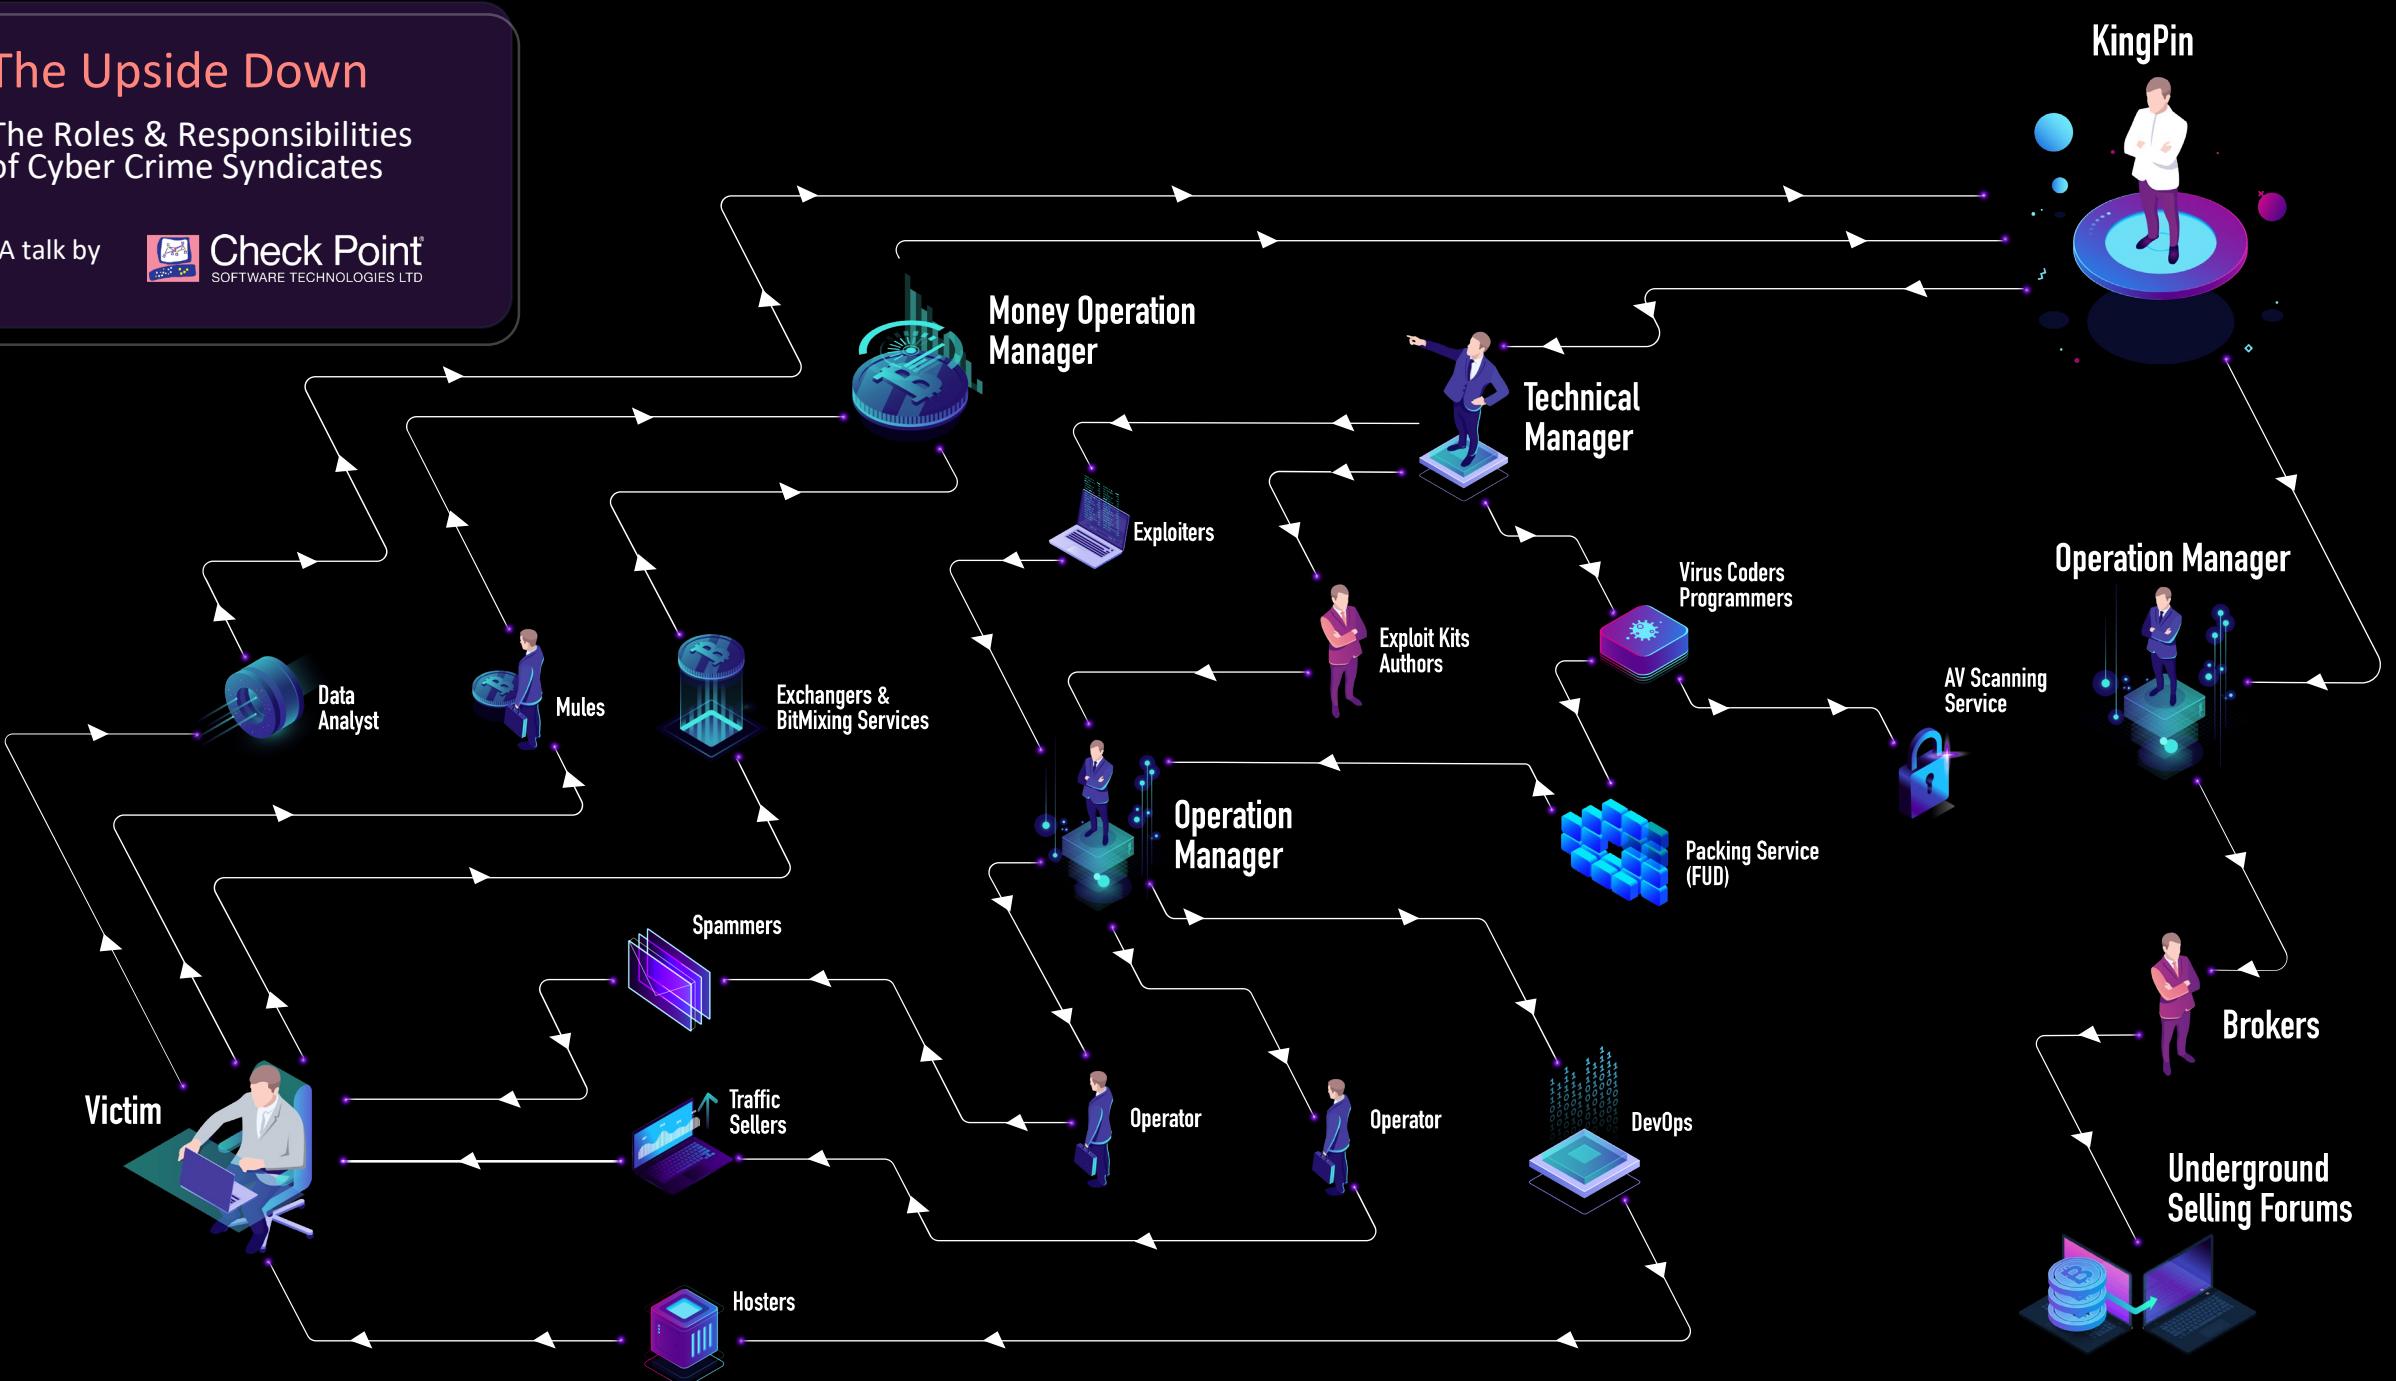

Stiller - a program that steals passwords from the victim's computer. This stylus steals passwords from all browsers and sends them to you in the admin panel with a nice and intuitive interface.

A person opens the styler with a double click of the mouse - and all of his logins-passwords fly to your admin panel!

IoT Botnets - Timeline

2016

[FREE] World's Largest Net:Mirai Botnet, Client, Echo Loader, CNC source code release
Yesterday, 12:50 PM (This post was last modified: Yesterday 04:29 PM by Anna-senpai.)

Anna-senpai L33t Member

Preface
Greetz everybody,
When I first go in DDoS industry, I wasn't planning on staying in it long. I made my money, there's lots of eyes looking at IOT now, so it However, I know every skid and their mama, it's their wet dream to have something besides qbot.
So today, I have an amazing release for you. With Mirai, I usually pull max 380k bots from telnet alone. However, after the Krebs DDoS, shutting down and cleaning up their act. Today, max pull is about 300k bots, and dropping.
So, I am your senpai, and I will treat you real nice, my hf-chan.

CHECK POINT RESEARCH
Huawei Home Routers in Botnet Recruitment
December 21, 2017

- A Zero-Day vulnerability (CVE-2017-17215) in the Huawei home router HGS2 has been discovered by Check Point Researchers, and hundreds of thousands of attempts to exploit it have already been found in the wild.
- The delivered payload has been identified as OKIRU/SATORI, an updated variant of Mirai.
- The suspected threat actor behind the attack has been identified by his nickname, 'Neus Zeta'.

EXCLUSIVE
Federal prosecutors quietly indicted this 20-year-old, and rival hackers say he's behind a king-sized botnet. But did he really have the skills to pull it off?
Kane Poston, 16, 33, 16, 14, 13 AM ET

[Cerber Ransomware - Партнерская программа](#)

crbr 24.02.2016, 15:35

В настоящий момент партнерская программа работает в приватном режиме!

Доброго времени суток, уважаемые участники форума Exploit.in!
Сегодня я рад представить Вашему вниманию новое решение по монетизации Вашего трафика.

>>> Cerber Ransomware <<<

Итак, начнем...

Схема шифрования:

После запуска на компьютере пользователя генерируются локальные ключи RSA. В дальнейшем эти ключи будут использоваться для шифрования и расшифровки файлов.

Предварительно в релиз зашит глобальный публичный ключ RSA 2048 бит. Данный ключ используется для шифрования локального приватного ключа RSA 576 бит.

Глобальный приватный ключ RSA 2048 бит находится на .Onion сервере в анонимной сети.

После шифрования локального приватного ключа RSA 576 бит генерируется список файлов определенных расширений, список сортируется по времени создания и времени модификации.

Начинается шифрование файлов.

Каждый файл шифруется с помощью алгоритма RC4 с длиной ключа 128 бит. Для каждого файла генерируется случайный ключ, который шифруется с помощью локального публичного ключа RSA 576 бит.

Шифруется не только содержимое файлов, но и их имена. Меняется время создания и время модификации файлов.

После шифрования всех файлов пользователю показывается инструкция по расширению функций. Для расшифровки файлов пользователю необходимо скачать "Tor Browser", зайти в него и ввести ссылку.

Лэндинг:

Лэндинг имеет понятный и дружелюбный интерфейс. Перед авторизацией на сайте есть возможность выбрать один из 12 языков:

- Английский;

Good day, dear forum participants
Today, I am pleased to present a new solution for the monetization of your downloads!

>>> Cerber Ransomware <<<

So, let's begin...

encryption scheme

After starting the local RSA 576-bit keys (private and public) are generated on the user's computer.
In the future, these keys are used to encrypt and decrypt files.
Pre-release sewn into a global public key RSA 2048 bits.
This key is used to encrypt the private key of the local RSA 576 bits.

Global RSA private key is 2048 bits on .Onion server anonymous Tor network.

After encrypting the private key of the local RSA 576 bits generated list of files to encrypt. This list contains the files of certain extensions, the list is sorted by file modification time and importance.

It starts encrypting files.

The Upside Down

- Cyber Crime as a profession
- Accessible to anyone
- More hackers > more attacks
- Industry to fight back
